INTRODUCTION

We are proud to present Piotr Bańka's Audience Add-Ons® Sound Library, which consists of homogeneous sound audience reaction sequences, recorded in selected acoustic environments (e.g. theatre, opera house, TV broadcasting studio etc.) during real comedy shows. The reactions of the audience involved in the event are full of genuine emotional content which is impossible to achieve during studio recording. And all this comes in surround!

Carefully selected, these realistic reactions in the hands of a skilled producer may raise the atmosphere and enliven any show! Unlike other sound libraries available on the market, The Audience Add-Ons® Sound Library offers unmatched sound homogeneity allowing for complete synchronizing with a given program.

To make it easier, all sound files are broken down by the type of effect: applause, laughter, ovation, cheers, and by the duration of relevant sound effects. To ensure use-friendly navigation through the recordings, they are divided into folders, which, combined with a detailed description, allows you to quickly find the most suitable effect for the desired video sequence. Wary of poor acoustics of the premises or unreceptive audience? – Worry no more! This audio library is an excellent remedy you have long been looking for!

The original sound material was recorded in surround in carefully selected venues of superior acoustic properties. During the post-production process all the reactions were carefully band-corrected and cleaned from any type of distortion. The dynamic range was gently narrowed giving the natural room perception. No emphasis was added. Stereo 2.0 version was down-mixed carefully to Left/Right Total for Pro Logic compatibility.

AUDIENCE ADD-ONS® COMEDY Live! - STUDIO

This Sound Library comprises two sets of reactions of the audience recorded in two different TV studios during the performance of two different genres. All in 5.1* & 2.0

Studio A

A set of 95 sound effects ranging from applause through standing ovation to laughter recorded in a TV studio during a two hour show in the presence of 390 viewers. A lively and responsive audience, ideal for any performance with a dynamic sequence of events. Close-ups as well as wide shots perfectly reflect acoustic properties and sound selectivity of the auditorium hall. A broad scope of the recorded material as well as its dynamic range meet the requirements of audio materials recorded for film and television. Since all effects are homogenous, they can be easily used in a sequence of audience reactions for post-production purposes.

Studio B

A set of 91 sound effects ranging from applause through standing ovation to laughter recorded in a TV studio during a two hour show in the presence of 270 viewers. A nice and friendly audience, ideal for any type of event where cosiness and a homely atmosphere is an asset. Close-ups and medium wide shots reflect excellent acoustics, sound softness, and sound selectivity of the auditorium hall. Since all effects are homogenous, they can be easily used in a sequence of audience reactions for post-production purposes.
